

IMA presents the perfect single-ply cutting solution at SAMAB

SAMAB was held in Milan, Italy, from May 27 to 29, 2025. In an interview with JSN, Mr. Mirella Sardini, President of IMA, made the following comments:

“It’s been so many years, but we finally got to see a new edition of SAMAB in Milan, Italy, along with many other main producers of clothing industry machinery. Considering the difficult period we are generally facing, we honestly didn’t have great expectations, but the exhibition turned out to be a great success, and we also collected important new contacts. As such, we would like to thank all the visitors who decided to stop by our booth to investigate our range of products.

We displayed our new 3 cm cutter 922.30 and our feeder 868.16, the perfect solution for the single-ply cutter, and a solution which is more suitable for European and Italian markets. Of course, when combined with our 3 cm cutter, customers can not only manage single-ply production, but they can also multilayer one with much great flexibility.

We also introduced our MAXIMA series with the digitizing systems. We offered demos of our DigitPen , a flexible and portable pen with clever CAD software, and we also introduced a smart mannequin which our

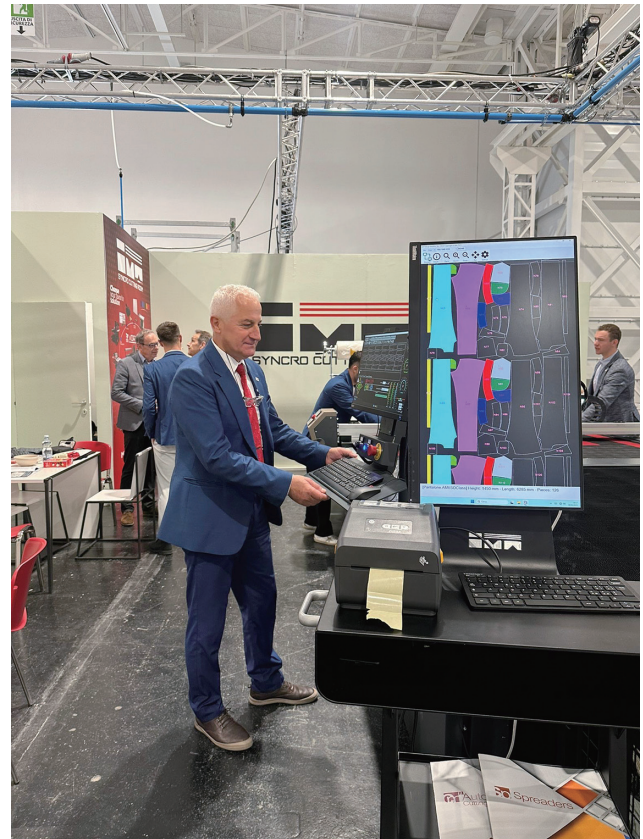

customers, particularly from design schools, really appreciate.

Throughout the show, our show room was equipped with our new Typhoon HD, our denim and rigid fabric

line . We also introduced the first IMA single-ply, ONE PLUS, which is our new solution, in addition to our

multilayer cutters.”
